

Maria has made a little blanket. When the wind blows, it's nice and warm.

Here the patients lie in the open air. Fresh air is good for them and the fence keeps them safe.

There are three drivers. One for each floor. If the first driver falls asleep, the second one takes over. If he sleeps the third one is awake. But if the third one falls aslepe, even Maria's ambulance won't work.

Inside here are 3 more patients. One on each floor. That's tidy. Each patient is a matchstick, neatly wrapped in tissue paper. For safety's sake.

All the drivers get out through this door. Because they have to get out somewhere. They have to get out headfirst but that doesn't bother Maria.

Ten wheels of course. All 3 storey ambulances have 10 wheels don't they?

Ambulance Built by Maria, age 15

your brick

Do you think Maria's ambulance looks like a real one?

You probably say, »No«. Common sense tells you that it doesn't look like a real one.
But common sense is something invented by us grown-ups. Maria, who is five years old, built it exactly as she wanted it.
For her it's an ambulance.
She built her ambulance with LEGO. Because LEGO has no limits.
That's the whole idea behind LEGO.
And this year you can build even more. As you can see from the pages which follow, there are trains, little cars, big lorries, planes, boats, cranes, dolls house furniture, kitchens.
When you've built a model and played with it for a day or so, you can take it apart and build something completely different with the bricks. Just as Maria did.

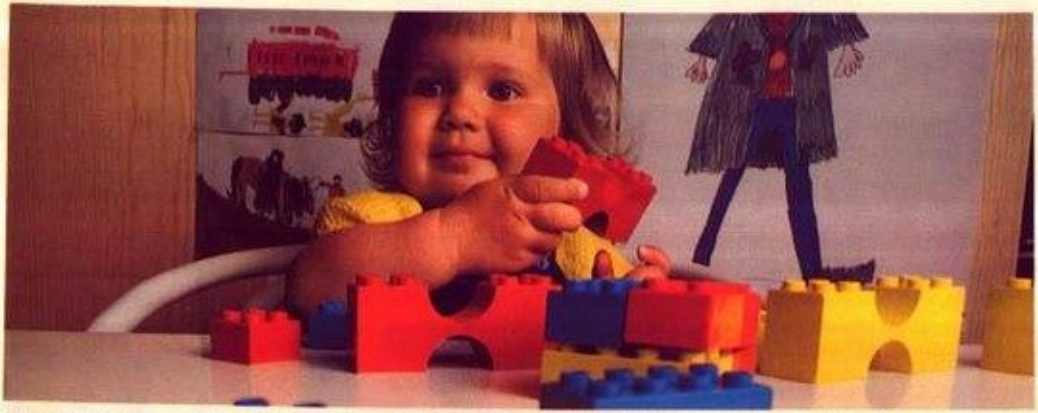

Here's just a little of all that's new:

Windows with shutters you can open and close, real boats that sail on the water, more colourful bricks, more dolls furniture you build yourself, new Legoland cars, a helicopter, a plane, a big trailer with a steam shovel. A v much much more.

your brick

Lego® Duplo

When you're very small you've got little, fumbling fingers. Then it's best to play with big blocks. LEGO's big blocks are called Duplo. Duplo suits you just fine when you're as little as one year or 18 months.
Then when you get older Duplo continues to be just as much fun. It fits together with all the new proper LEGO bricks you buy.
So if you are building a BIG model, the Duplo bricks still come in very handy. Mum and Dad will.appreciate that too. They like toys which last.

New Basic Sets

A LEGO basic set contains all kinds of bricks in all colours. It's a good beginning or an equally good addition to a LEGO collection.
You can begin even as a three year old.
You can build all of the models shown on the outside of the box. Better still, you can also build your own "imagination-models".
LEGO has no limits. That's the idea behind LEGO.
This year there are many new basic sets to choose from.
With doors and window shutters which open and close. More coloured bricks. And many other things.

New Dolls Furniture

This year there are eight new little packs of dolls furniture. Now you can furnish your own dolls house. And build the dolls house itself from a Basic Set. Just the way you want it.
You can also buy a room-setting pack to furnish an entire kitchen, living room or child's bedroom. Complete with everything you need.

Legoland®

Legoland isn't just a lot of little cars. It's also houses. Or a whole fire station with ready-to-go fire engines. Or a helicopter, a windmill or a jet plane.
You can build a whole city, if you like.
There are lots of new things to look for in Legoland this year. Just look at all the pictures and see for yourself.
You can build fine cars when you're only three or four years old. Even at that age you like having wheels that turn and doors that open. And ladders and cranes you can raise and lower.

New Legoland® boats

LEGO has something it never had before – boats that can sail on water. You can decide whether to build a small or a big boat. Long or short, the hull is easy to build from big sections.
It isn't just in summertime you can sail boats.
The bathtub is good for sailing, too. Or pretend sailing on the carpet.

377 – £ 1.85
Low loader with crane

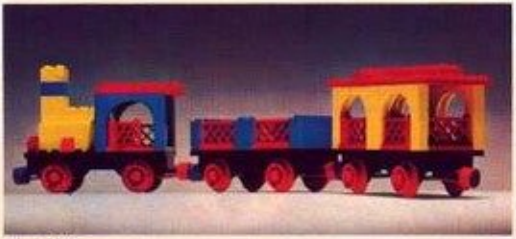

383 – £ 1.95
Low loader with steam shovel
NEW from April

your brick

Lego® Trains

You build a LEGO train yourself.
When you're very young, you want a train without rails, one that you can push without having it fall off the tracks. LEGO has one like that. When you get a little older you can build bigger battery-driven trains which run on rails. LEGO has those too. And signals, switches, couplings, extra rails. You can build the station with bricks from your Basic Set.

170 – £ 1.95
Pushalong play train
NEW from April

171 – £ 3.20
Complete train set without motor

181 – £ 7.30
Complete train set with motor, signals and shunting switch

128 – 88 p
Mobile crane

Straight rails

151 – 54 p
Curved rails (half circle)

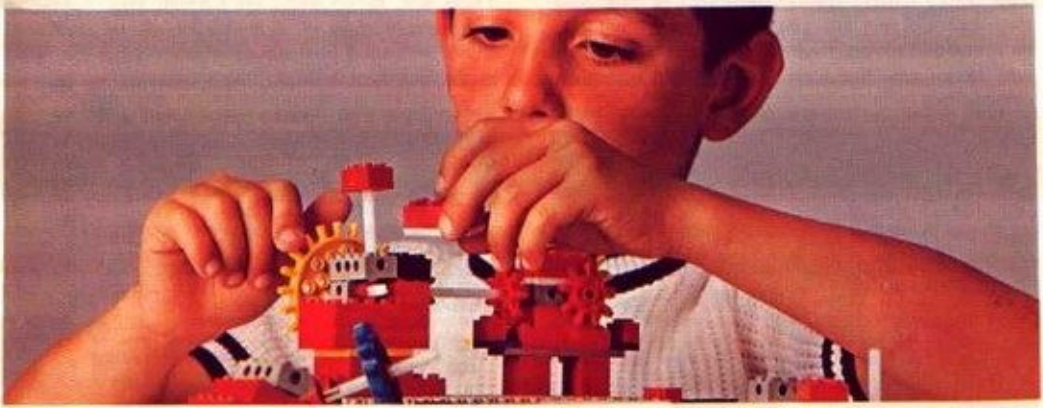

154 – 73 p
Rail points

1 – 54 p
Rail crossings

your brick

Gears

You can easily incorporate gears into things you build with your regular LEGO bricks. When you do, it's as if you are building something completely new. Things begin to whirr and turn, go up and down, backwards and forwards. You can also connect the motor to the gears. Then everything goes by itself.
The gears really get the imagination going. But you will need to be five or six years old before you build something like this yourself.

800 – £ 5.00
Gears, motor and bricks

801 – £ 2.20
Gears and bricks
802 – £ 1.02
Gears only

your brick

Every Lego part fits every other part. Even motors, gears, rails, little cars and dolls furniture all clip together in the same simple way. So whenever you buy a new pack it is not only a toy in its own right but an addition to your collection, opening up still more opportunities for new and exciting models of your own design. And building the models *you* want is what Lego is all about.

The names LEGO, LEGO Duplo and LEGOLAND are registered trade marks belonging to Interlego AG or Kirk Kristiansen & Co.
